PROFESSIONAL SUMMARY

I'm a game developer with a strong computer science background, specializing in implementing core gameplay mechanics with Unity and Unreal Engine. My passion is creating engaging worlds that captivate players and inspire new creators.

EDUCATION

Masters of Science - Computer Science **Jan 2026 - May 2028 (Expected)**

Khoury College of Computer Sciences, Northeastern University, Boston, Massachusetts, USA ● **CGPA: 3.67**

Bachelor of Science - Information Technology **Aug 2022 - Jun 2025**

SVKM's Narsee Monjee College of Commerce and Economics, Vile Parle, Mumbai, Maharashtra, India ● **CGPA: 3.6**

WORK EXPERIENCE

Media Services Technician **Jan 2026 - Present**

Northeastern University, Boston, MA

- Operate AV systems for 50+ events (audiences up to 1,000+), managing 32-channel audio boards, wireless mics, and projection.
- Diagnose and resolve critical AV failures in sub-2-minute windows, coordinating live with ITS and stage managers.
- Program and execute dynamic lighting cues on ETC lighting boards for university productions and live ceremonies.

Game Programmer **Jun 2023 - Nov 2025**

Freelance, Remote

- Developed game mechanics in Unity (C#) and Unreal Engine (C++/Blueprints) for 50+ clients across 100+ micro-projects.
- Delivered end-to-end gameplay systems including physics, AI, and UI, sourced through private Discord communities.
- Managed full project lifecycles independently, handling client scoping, iterative development, and final delivery.

Technical Department Member **Sep 2022 - Mar 2023**

NM Arthashastra, Mumbai, India

- Built and maintained the festival website using WordPress for NM College's annual inter-collegiate academic festival featuring 27+ events across multiple domains.
- Collaborated with a 50+ member organizing team to deliver a multi-day festival drawing participation from colleges across Mumbai and nationally.
- Supported technical operations including event logistics and digital infrastructure for competitions, speaker sessions, and workshops.

PROJECTS

Counting Sheep **Aug 2026**

- A 3D arcade platformer made solo in 96 hours for the GMTK Game Jam 2026. You guide a floaty sheep across cloud-cube numerals that crumble and reform under you as a sleeper counts down to sleep.

Harvest Rush **Aug 2026**

- A fast-paced couch co-op and solo farming game where players till soil, sow seeds, water crops, and rush harvested produce to a scheduled delivery truck while defending the farm from hungry pests and spreading fires.

Tic-Tac-Gone **Oct 2026**

- A 3D take on tic-tac-toe for the browser where each player can only keep three pieces on the board, and placing a fourth removes their oldest. Built with Three.js, with local two-player and a computer opponent on three difficulty levels.

Pokémon Bushido **Feb 2021**

- Pokémon Bushido is a fan-made game set in a feudal Japan-inspired region, where players train Pokémon to become a Kenshi, battling rival clans and dark forces in a unique samurai-themed adventure.
